

## Frequently Asked Questions

### DEI LED Lite'N Boltz - Button Head™

#### *Can I use these on any 12v system?*

Yes, these can be placed on any 12v system. They are a great addition to wire to a brake light on a motorcycle or car (red). Having the light activated with the brake light will draw attention and make the following vehicle more aware of your intentions.

#### *What are the sizes and specifications?*

Our Button Heads are made of stainless steel and are 3/4" long. The threads are 5/16" -18 and the button head is 9/16" wide. The allen head is 4.5mm. They are sealed so you do not have to worry about weather conditions. Also, we offer them in six different colors and they come two per pack.
