

MUFFLER SHIELD

NEW

Golf Cart Muffler Shield Kit

The Yamaha G Series golf carts are one of the most popular cart models available today. Its durability and function make it a favorite for retirement communities and golf courses across the country.

The compact engine design puts the muffler directly below the drivers seat. During periods of warm weather driving or a few minutes of idling, the heat from the muffler can make the seat quite uncomfortable. DEI now offers a wrap-around muffler shield kit that provides an extra layer of protection. This helps contain the excess heat getting to the seat.

In addition to keeping the seat cooler, the muffler shield also suppresses the sound and vibration, resulting in a cooler and quieter cart. Installation is easy with basic hand tools and can be performed with the muffler still on the vehicle.

- Reduces discomfort caused by excessive muffler heat
- No permanent modifications are needed for installation

YAMAHA GOLF CART MUFFLER SHIELD
