

OIL RUG

**NEW**

# Oil Rug

Oil Rugs are designed to contain and absorb oil spills under vehicles, motorcycles, around machinery, under leaking equipment, and other maintenance areas. They can absorb hazardous and non-hazardous materials including oil, petroleum and glycols.

These absorbent rugs can be used to protect floors, work areas such as work benches - anywhere there's a potential of oil or petroleum spills or leaks, and make clean up easy.

DEI Oil Rugs are constructed with an absorbent felt face, hydrophobic material and backed with a barrier layer to contain the fluids. Oil Rug edges are sealed to keep contaminants in the rug and can absorb over 16 ounces of typical motor oil per square foot.

- Keeps oil contained
- Absorbs spills and drips
- 3 different sizes

**SEALED EDGES TO  
CONTAIN SPILLS**

#### OIL RUG

Part #	Description
