

DAMPING MATERIAL

NEW

Vibration Damping / Fender protection Flex Damping Material

Designed for applications that require a damping material that can conform to odd shapes and tighter bends than our standard Boom Mat. Boom Mat Flex can be used to form around tight curves, used inside wheel wells, around tubing and pipes and other areas where the standard Boom Mat Aluminum may not conform easily. Made from the same high quality 2.5mm thick Butyl rubber bit with a clear poly surface that allows it shape around any surface.

- Black textured finish
- Cooler hood surfaces protects your paint
- Reduced engine noise for quieter passenger compartment
- Easy peel & stick installation
- Measures 32" x 59"

FLEX DAMPING MATERIAL

Part #	Description
050225	4 - 12"x 12" squares (4 sq ft)
