

Frequently Asked Questions

DEI High Temperature Spray Adhesive™

Where should I use this?

Our HT Spray Adhesive can be used anywhere there is a need for adhesion of material near higher temperature areas. Heat Screen is a good example. Heat Screen can be placed under carpets in cars or trucks to isolate heat. Simply spray our HT Spray Adhesive on the floor pan and place the Heat Screen on top to anchor the material.

Product highlights

Hi Temp Spray Adhesive forms a high strength bond to many surfaces. It will hold its properties up to 160 degrees F. It dries quick and clear with a water resistant bond. The spray valve has a three way adjustable outlet for ease of application. It comes in a ten ounce spray can and can be used in many ways.
