

## Frequently Asked Questions

### DEI Hi-Temp 3:1 Shrink Tubes™

#### *What are the benefits to this type of tubing?*

Our tubing is made of a professional grade flexible flame retardant polyolefin material. It insulates as well as protects the inside components from foreign material. It shrinks down to 33% of its original diameter. It also will not shorten in length when the diameter is reduced. Multiple sizes and bulk lengths are available.

#### *Military Specs*

Military Spec-DTL-23053/5c

#### *Operating Temp Range*

Operating temp range is 67° F to 275° F.

#### *Initial Shrink Temperature*

Initial shrink temperature is between 120° F and 180° F.
