

DAMPING MATERIAL

NEW

Vibration Damping / Fender protection Flex Damping Material

Boom Mat Flex™ is pliable enough to be used anywhere in a vehicle, even in areas with tight curves that are the most challenging. Boom Mat Flex easily conforms to odd shapes and tighter bends making it ideal to use inside wheel wells, fenders or around tubing and pipes.

Boom Mat Flex is made of a 2.5mm thick Butyl rubber with a black textured, clear poly surface and aggressive adhesive backing. It can be shaped and secured firmly around any surface to reduce bothersome noise while adding cooling insulation for a quieter more comfortable interior.

Features:

- Extremely flexible
- Peel & stick application
- 2.5mm thick
- Butyl rubber
- 12" x 12" squares

Additional uses include:

- Home theater or studios
- Quietening sheet metal heat & cooling ducts
- Commercial & industrial applications where sound damping is needed

FLEX DAMPING MATERIAL

Part #	Description
050225	4 - 12"x 12" squares (4 sq ft)
050227	10 - 12"x 12" squares (10 sq ft)
050228	2 - 12"x 12" squares (2 sq ft)
