## EV Fire Blanket

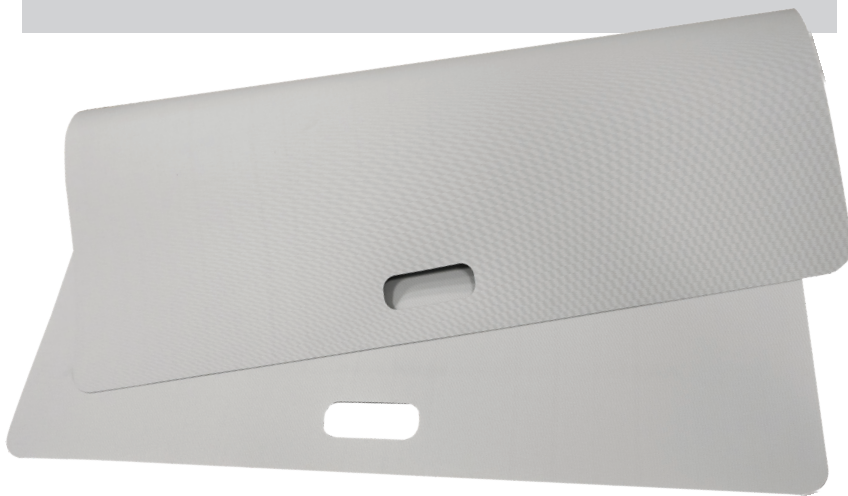

### Safety barrier for EV and battery fires

Our cutting-edge fire blanket is specifically designed to create a robust barrier between high-performance LiPo batteries and passengers, ensuring maximum protection against potential fires in electric vehicles.

- Safety Cover for EV LiPo battery fires
- Thermal-resistant fabric can withstand heat up to 2700°F, providing a critical shield in the event of a battery malfunction
- Creates a protective barrier between driver & fire. No burn-through for up to 30 minutes
- Can be used as a protective layer between Lipo battery storage compartment and the rest of the vehicle
- EV Fire Blanket material is also sold separately and in custom cut lengths

**A must have piece of safety equipment at every track for emerging EV racing markets**

**Important safety gear for first responders**
