

OIL FILTER HEAT SHIELDS

Oil Filter Heat shields

Oil filters soak in a lot of heat from high performance engines. They are nestled tight to the oil pan and engine. DEI's Oil Filter Heat Shield effectively blocks radiant heat that can change the oils viscosity or potentially cause a thermal breakdown that will make the oil additives degrade, dissipate, and wear out quickly. These easy to install Oil Cover Filters block that heat and reduce oil temps. Universal trim to fit size works on all oil filters and come in a 3 pack.

- Keeps oil cool
- reduces heat soak into filter & oil
- Easily trim to fit
- 3 pack

Blocks heat from engines & oil pans from soaking into filter keeping oil cooler.

OIL FILTER COVERS

Part #	Description
010740	3.5" - 4.5" x 4" 3 Pack
010741	2.5" - 3.5" x 3" 3 Pack
