

RADIATOR RELIEF

Radiator Relief Chill Charger

Chill Charger for water-to-air intercoolers maximizes thermal transfer to lower air intake temperatures while also protecting core corrosion, electrolysis and harmful mineral build up. By effectively transferring water that circulates through the intercooler Chill Charger reduces liquid heat soak in high performance turbo and supercharger systems.

- For air to water intercoolers
- Maximizes heat transfer
- Reduces liquid heat soak from turbo chargers and downpipes
- Reduces corrosion and mineral build up
- Compatible with all types of anti-freeze
