

RADIATOR RELIEF

Radiator Relief for Diesels

Blended for extreme use, it is an excellent method of treating diesel cooling systems to reduce coolant temps as a preventive step to help avoid overheating, electrolysis and chemical corrosion. Anti-foaming agent and corrosion inhibitors balance the negative acidic effects that can develop over time. Safe to use with all types of radiator materials including cast iron, copper, brass and aluminum.

- Blended for extreme use
- Decrease coolant temp up to 30°F
- Quicker warm-up
- Helps reduce engine wear
- Recommend 1oz per quart of coolant

RADIATOR RELIEF FOR DIESELS

Part #	Description
040204	16 oz bottle
