

HEAT SHIELD KIT

NEW

Can-Am® Commander™ MAX Heat Shield Kit

The Can-Am® Commander™ is a popular choice among UTV enthusiasts for its sporty performance and aggressive power delivery. But the mid-engine mounted Commander™ is prone to heat build-up in the cockpit. This is especially true during slow running conditions or when a roof and windshield are installed.

DEI now offers a rugged heat shield kit to reflect and insulate excessive heat entering the cockpit. Each piece is adhesive backed and precision cut for easy installation. With this heat shield kit installed, you can ride further and in greater comfort.

- All 4 seat models 2016-2021
- Blocks heat build up in the cockpit area
- Reduces engine noise & vibration
- Adhesive backed & precision cut
- No modifications are needed for installation

CAN-AM COMMANDER HEAT SHIELD KIT

Part #	Description
901061	Heat Shield Kit
