

HEAT CONTROL KIT

Kawasaki Teryx Heat Control Kit

The Kawasaki Teryx with its mid-engine design presents a challenge keeping the riders cool. The DEI Powersports Heat Control kit will reduce radiant heat coming through the center console, interior panels, under the driver's seat, and in the cargo bed. The CNC cut pieces are a 10 mil dimpled aluminum with a glass fiber insulation and an aggressive self-adhesive backing. The kit also includes an insulated mat that replaces the stock rubber engine cover inside the console and insulated line sleeving to block heat from the cooling lines on the driver's side. The final component of this kit is an insulated panel that installs under the bed and blocks heat from the exhaust system radiating up into the cargo area. This comprehensive kit will make a noticeable difference in heat and give the riders a cooler more comfortable ride.

Fits 2014-2022 Kawaski Teryx 2 seat model

Features:

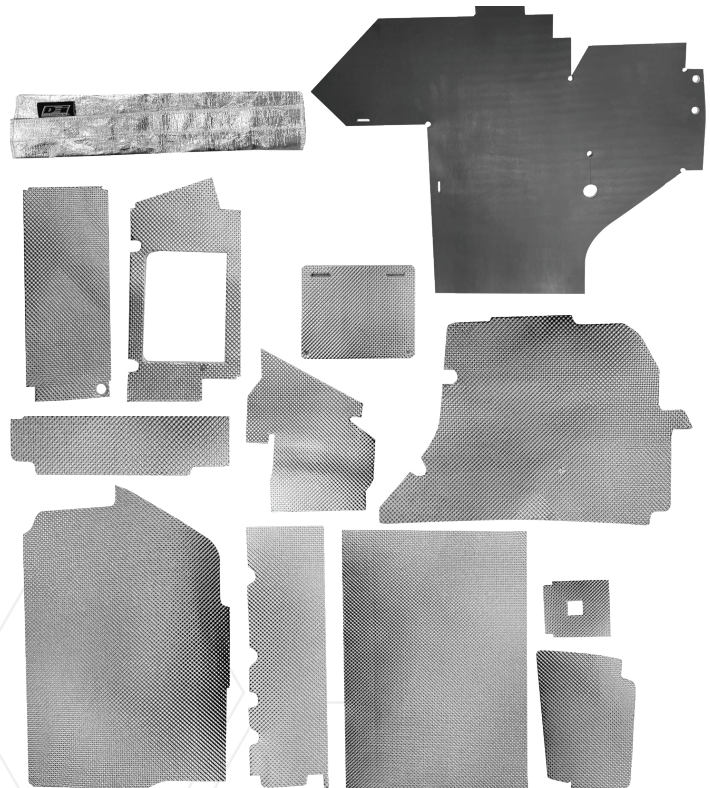

- Heat & Sound Barrier Insulation
- Heat Shroud Line Sleeve
- Extreme Heat Barrier good to 1750°F Radiant
- Aggressive self adhesive backing

Advantages:

- Long lasting Durable materials
- Easy to Install
- More Comfortable ride

Benefits:

- Blocks heat buildup in the interior
- Long lasting durable materials
- No modifications are needed for installation

KAWASAKI TERYX HEAT CONTROL KIT
