

# NEW PRODUCT FROM DEI

## MIATA HEAT SHIELD KIT

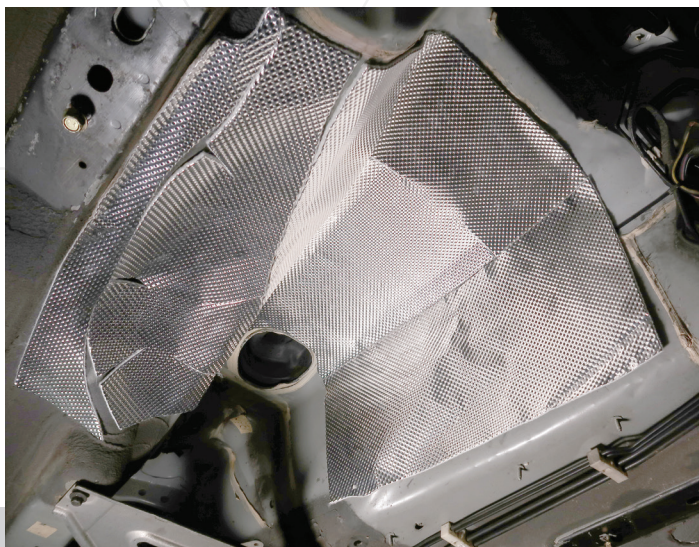

**IN STOCK**

### 2006-2015 MAZDA MIATA TRANSMISSION TUNNEL SHIELD KIT

A well known and long time problem with the Miata is the amount of heat transferred through the console and into the interior. DEI offers a solution to dramatically reduce the amount of heat coming from the transmission tunnel and entering the driver and passenger area.

We have custom designed our heat shield kit specifically for the 2006-2015 Mazda Miata NC models. Each kit is precision cut for a precise fit. Kits are constructed of highly reflective and durable aluminum outer layer and bonded to a finely woven glass fiber composite.

DEI Miata kits are extremely lightweight, able to withstand harsh road conditions, and are wear resistant. They are not affected by the elements such as water, wind, dirt or debris.

#### Features:

- Insulating inner layer
- Heat reflective outer layer - withstands up to 1700°F
- Aggressive peel & stick adhesive backing for a secure fit
- Includes high heat reflective seaming tape
- Precision CNC cut for precise fit

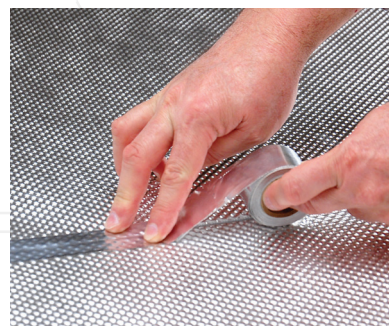

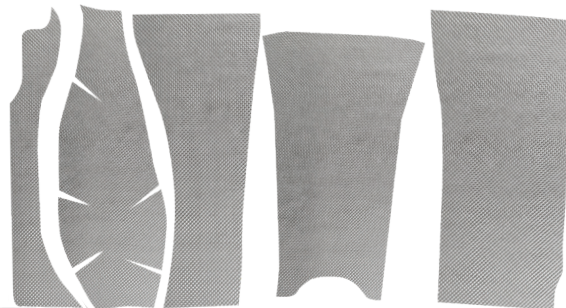

#### Advantages:

- Extremely lightweight
- Replaces damaged or missing factory heat shield
- Acts as thermal barrier to prevent heat soak into the cabin

#### Benefits:

- Keeps interiors cool & safe
- Helps prevent driver fatigue from excess heat
- Protects interior components and passengers

#### PRECISION CUT PIECES FOR EXACT FIT & EASY INSTALLATION

**INCLUDES REFLECTIVE TAPE FOR SEALING SEAMS**

#### MAZDA MIATA NC TRANS TUNNEL HEAT SHIELD KIT
